Stop the massacre of the kangaroos in Australia

Dear Prime Minister John Howard,

We are writing to ask that you stop the slaughter of kangaroos in Australia. 6.9 million kangaroos are projected to be killed in Australia this year. They are hunted during the night. The joeys are taken out of their mother's pouch; sometimes stomped to death and other times left to suffer in the wild. These gentle and amazing creatures are then turned into soccer cleats, hand bags and other items which can be produced without the need to take a life.

This slaughter must stop! Don't allow your country's image to be tainted with their blood.
